

How to Setup The Weather?

Step 1. Go to <http://www.yr.no> and search for your preferred location in the search field.

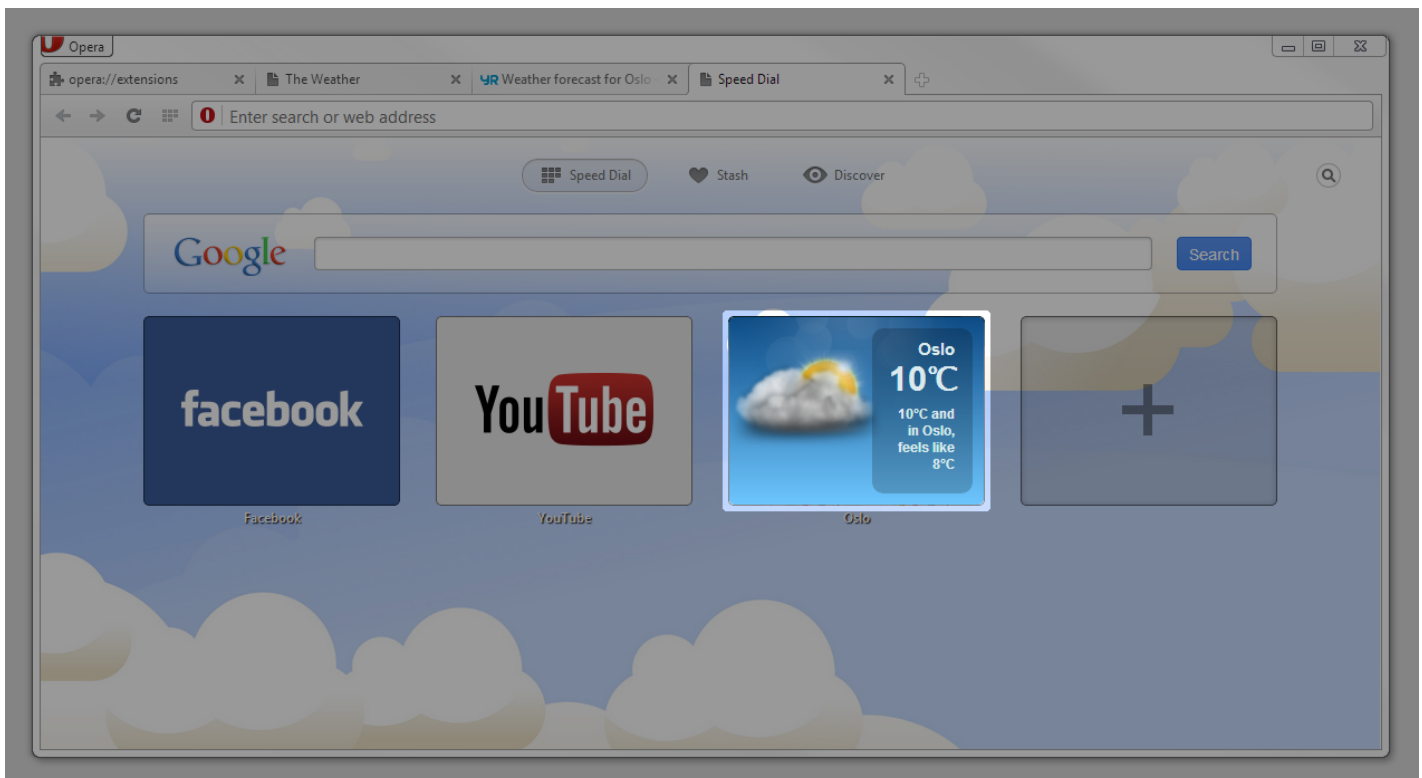

Step 2. Locate 'Use this location in the Opera Speed Dial' in the top right corner of the page.

2.1. If you have only one instance of 'The Weather' extension simply click this button.

Step 3. Go back to your Speed Dial. The weather for your chosen location should appear in the proper Dial.

That's it!
